

Solutions Driven delivers excellence in tailored training and assessments to meet compliance and company objectives. We do this through on-site delivery or one on one coaching models.

We bring extensive construction and coaching experience and deliver this in an easy to understand format. This has been developed through our trainer's hands-on experience in construction projects and the solving of related problems for past clients.

Objectives

We assist existing construction workers to receive recognition of competency for the skills they have obtained through their workplace. We do this for workers employed in the following areas;

- Civil construction
- Work Health and Safety
- Building Construction
- Project management
- Mining

What makes us different?

We offer a premium delivery service for one-on-one coaching on site, or at your place of preference, tailored towards your style of learning and your work direction. We also offer group sessions in your place of preference for delivery, tailored towards your style or workplace outcomes. Our delivery of training sessions can be contextualized towards your work outcomes.

Value Proposition

Compliance based certification for the construction and mining sectors.
